

***FBC Presents***

# **U.S. Army Heat Center Heat Forum**

**Date/Time: March 4, 2026**

**MCoE HQ, Fort Benning, GA**

## ***General Information***

Heat is a leading cause of death and injury to our soldiers. To provide an opportunity for leadership from across the DoD to share information on heat illness and injury prevention, The Army Heat Center at Fort Benning hosts the annual Heat Forum.

This one day event, supported by the Commanding General, features conference sessions delivered to company commanders/support personnel in the morning and specialized medical content for U.S. Army health personnel in the afternoon. Expected in-person attendance is 150-200, with an additional 150-200 joining from the virtual platform. This is a great opportunity to network with leadership from across the Army Public Health community, as well as the day-to-day soldier and contractor occupants of Fort Benning.
